Reasons for Allowance

1. An amendment was received from the applicant on December 23, 2003.
2. Claims 1-10 are allowed.
3. The following is an examiner's statement of reasons for allowance. The boat propeller safety enclosure as claimed is not shown or suggested in the prior art because of the use of a cover having a first side with a shape and a second side with an adjustable opening, and having a second opening for drainage, in combination with a hard circularly shaped insert panel that is arranged within said cover adjacent to said first side in order to make or force said first side to be flat and to define said shape of said first side as circular, as well as a cinch region located on said second side to define the size of said adjustable opening.
4. The prior art as disclosed by Carlisle (US 5,664,975) shows the use of a boat propeller safety enclosure that is comprised of a cover having a first side with a shape and a second side with an adjustable opening, and having a second opening for drainage, as well as a cinch region on said second side of said cover for defining the size of said adjustable opening. Beck (US 5,222,802) discloses a flexible bag assembly that is comprised of a flexible bag, a spherical support structure that is positioned within said bag through an opening in said bag, and a cinch region for closing said opening. However, none of the prior art cited shows or suggests the use of a boat propeller safety enclosure that is comprised of a cover having a first side with a shape and a second side with an adjustable opening, and having a second opening for drainage, in

combination with a hard circularly shaped insert panel that is arranged within said cover adjacent to said first side in order to make or force said first side to be flat and to define said shape of said first side as circular, as well as a cinch region located on said second side to define the size of said adjustable opening.
